# Insulating solutions in railway infrastructure

## Safety:

- Electrical:  
Dielectric strength: protection against the risk of electrocution through indirect contact.
- In front of fire:  
Reduces the risk of electrical arcs and fire sources.  
Own formulation of our raw materials, providing outstanding features with regards to standard ones.
- Reliability of the signal transmitted:  
Avoids eddy currents and facilitates the control of the grounding system.

## Cost reduction:

- Earthing not required:  
No need for copper conductors.  
No costs derived from connecting the conducting element to the grounding system or from periodical checking.
- No induced or leakage currents, avoiding premature corrosion which usually affects metallic channelling.

## Over 35 years experience in outdoor installations:

- Non-metallic material: resistance to corrosion caused by outdoor exposure or by saline, polluted or chemically aggressive environments.
- Sturdy design, high impact resistance.
- Good performance outdoors and suitable for UV exposure, due to our own formulated raw materials.

## Mounting and integration

- Complete system of accessories and supporting elements in grey RAL 7035:  
Several mounting arrangements are possible.  
Homogeneous colour of the trays, trunkings and fittings, perfectly fitting with other constructive elements.
- Can be painted.

Cable distribution along the railway tracks (bridges, viaducts, tunnels, etc.)

## Gantries and catenaries

---

## Substations and technical rooms

---

## Stations and shelters

---

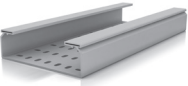

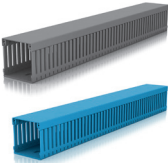

# Insulating solutions in railway infrastructure

The quality of Unex solutions is guaranteed by the strict accomplishment of product and application standards, as well as by obtaining quality marks and approvals.
