Nutzbare Querschnitte und Sichere Arbeitslast

# Belastungsdiagramm (+40°C) und +60°C

Mechanische Sicherheit:  
SWL = sichere Arbeitslast  
Typ I. Volle Belastung

**Temperatur**

**+40°C**

EN 61537:2007  
IEC 61537:2006

**Temperatur**

**+60°C**

EN 61537:2007  
IEC 61537:2006

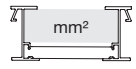

**Belastung**

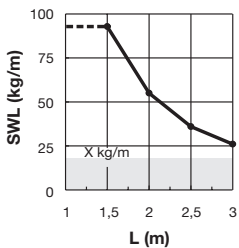

EN 61537

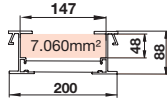

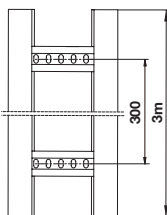

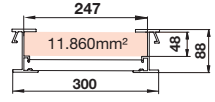

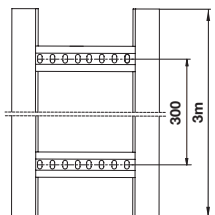

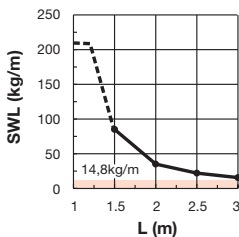

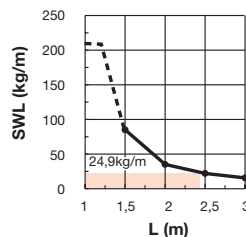

- Bedingungen des Prüfungstyps I:
  - Längsdurchbiegung <1%
  - Querdurchbiegung <5%
- Es gibt keine Einschränkungen bei der Positionierung der Stoßstellenverbinder.

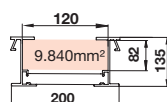

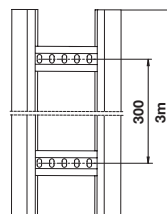

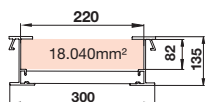

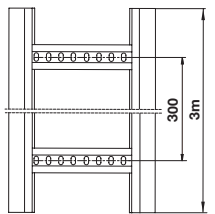

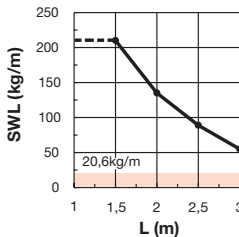

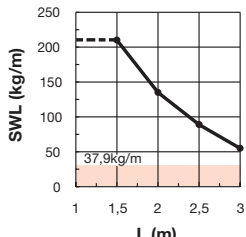

**Nutzbarer Querschnitt**

**Volle Belastung**

	67200-44	67300-44
H: 85 mm	 	 
		

	67220-44	67320-44
H: 135 mm	 	 
		

Volle Belastung =  
0,0021kg/m/mm² x nutzbarer Querschnitt

67400-44	67500-44	67600-44

67420-44	67520-44	67620-44
